1. Find the perimeter of the figure.

The perimeter is ________ feet.

Answer: 22

2. Find the perimeter of the figure.

Answer: 14

3. Find the perimeter of the figure.

Answer: 30

4. A new notebook computer with DVD player costs $595. Derik Muller has $940 in his checking account. How much will be left in his checking account after he buys the notebook computer?

Derik will have $_________ remaining in his checking account after he buys the notebook computer.

Answer: 345
5. Find the total land area drained by the C and D sub-basins.

\[ \text{Total land area} = 265,000 \text{ sq mi} \]

Answer: 265,000

6. How many more square miles of land is drained by the A sub-basin than the B sub-basin?

\[ \text{Difference} = 281,000 \text{ sq mi} \]

Answer: 281,000

7. Alexander is installing a pen for his dog. The pen will have the shape and dimensions of the figure shown to the right. How many meters of fencing are needed to enclose the area shown?

\[ \text{Fencing needed} = 412 \text{ m} \]

Answer: 412

8. A permanent game board is made of granite. It is in the shape of a square with side lengths of 33 ft. Find the perimeter of the square playing board.

The perimeter is \[ 132 \text{ feet} \]

Answer: 132
9. The table on the right shows the number of particular stores in ten states. Which state has the most stores?

State (1) _________ has the most stores.

The Top States for the Stores

Answer: 359

11. Round 2,675 to the nearest hundred.

The number 2,675 rounded to the nearest hundred is _________.

Answer: 2,700

12. Bargain Appliance Store advertises three washing machines on sale at $1099, $799, and $1399. Round each cost to the nearest hundred to estimate the total cost.

The estimated total cost is $_______.

Answer: 3300
13. Use the distributive property to rewrite each expression.

\[ 3(8 + 2) = \]

(Type an expression. Do not simplify.)

Answer: \[ 3 \cdot 8 + 3 \cdot 2 \]

14. Find the area and the perimeter of the rectangle shown to the right.

The area of the rectangle is \( (1) \) \_

The perimeter of the rectangle is \( (2) \) \_

\( \) cubic meters. \( \) square meters. \( \) meters. \( \) cubic meters. \( \) meters. \( \) square meters.

Answers 18

(1) square meters.

22

(2) meters.
15. Find the area and the perimeter of the rectangle shown to the right.

The area of the rectangle is (1) ______ square feet.

The perimeter of the rectangle is (2) ______ feet.

(1) ○ cubic feet. (2) ○ square feet.
○ square feet. ○ cubic feet.
○ feet. ○ feet.

Answers 900

(1) square feet.
136
(2) feet.

16. One triple fudge brownie contains 157 calories. How many calories are in 14 triple fudge brownies?

__________ calories

Answer: 2198

17. Cabot Creamery is packing a palette of 20-lb boxes of cheddar cheese to send to a local restaurant. There are three layers of boxes on the pallet, and each layer is four boxes wide by three boxes deep.

a. How many boxes are in one layer?

b. How many boxes are on the pallet?

c. What is the weight of the cheese on the pallet?

a. There are _______ boxes in one layer.

b. There are _______ boxes on the pallet.

c. The weight of the cheese on the pallet is _______ lb.

18. A plot of land measures 90 feet by 110 feet. Find its area.

The area of the rectangle is \( \text{(1)} \) \( \square \) feet.

- square feet.
- feet.
- cubic feet.

Answers 9,900

(1) square feet.

19. One ounce of nuts contains 179 calories. How many calories are in 14 ounces of nuts?

\[ \text{calories} \]

Answer: 2506

20. A plant for a tea company has bagging machines capable of bagging 1000 bags of tea per minute. If the plant runs 21 hours a day, how many tea bags are produced in one day?

The company produces \( \text{teabags} \) in one day of operation.

Answer: 1,260,000

21. Divide the following and then check by multiplying.

\[ \frac{420}{5} \]

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- **A.** The quotient does not have a remainder. The quotient is \( \square \).
- **B.** The quotient has a remainder not equal to 0. The quotient is \( \square \) R \( \square \).
- **C.** The quotient is undefined.

Answer: A. The quotient does not have a remainder. The quotient is \( 84 \).
22. Divide the following and then check by multiplying.

\[
3 \div 2066
\]

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- **A.** The quotient does not have a remainder. The quotient is ___________.
- **B.** The quotient has a remainder not equal to 0. The quotient is ___________ \( R \) ___________.
- **C.** The quotient is undefined.

Answer: **B.** The quotient has a remainder not equal to 0. The quotient is ___________ \( R \) _________.

23. For their wedding, Ben and Jen paid $19 for each guest's dinner. The total bill was $2185. How many guests did they have at their wedding?

\[ \text{？？？？？？？ guests} \]

Answer: 115

24. A truck hauls wheat to a storage granary. It carries a total of 5,848 bushels of wheat in 17 trips. How much does the truck haul each trip if each trip it hauls the same amount?

The truck hauls ___________ bushels each trip.

Answer: 344

25. Find the average value of the following list of numbers.

\[ 10, 22, 28, 26, 12, 16 \]

The average value is ___________.

Answer: 19

\[ 12 + 5 \cdot 9 \]

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- **A.** \( 12 + 5 \cdot 9 = \) ___________.
- **B.** The expression is undefined.

Answer: **A.** \( 12 + 5 \cdot 9 = \) ___________.
27. Simplify.

\[
\frac{37 + 42}{7}
\]

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- A. \( \frac{37 + 42}{7} = \) 
- B. The expression is undefined.

Answer: A. \( \frac{37 + 42}{7} = 43 \)

28. Simplify.

\[6 \cdot 9 + 2 \cdot 2\]

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- A. \( 6 \cdot 9 + 2 \cdot 2 = \) 
- B. The expression is undefined.

Answer: A. \( 6 \cdot 9 + 2 \cdot 2 = 58 \)

29. Simplify.

\[(2 + 3) \cdot (7 - 4)\]

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- A. \( (2 + 3) \cdot (7 - 4) = \) 
- B. The expression is undefined.

Answer: A. \( (2 + 3) \cdot (7 - 4) = 15 \)

30. Evaluate the expression for \( x = 4 \) and \( z = 2 \).

\[5xz - 3x\]

\[5xz - 3x = \]

Answer: 28
31. Evaluate the expression for \( x = 3 \) and \( z = 4 \).

\[ 5x - z \]

\[ 5x - z = \boxed{11} \]

Answer: 11

32. Evaluate the expression for \( x = 2 \) and \( y = 4 \).

\[ \frac{3y - 4}{x} \]

\[ \frac{3y - 4}{x} = \boxed{4} \]

Answer: 4

33. Evaluate the algebraic expression for the given value.

\[ x^2 - 4x + 3, \text{ for } x = 7 \]

When \( x = 7 \), \[ x^2 - 4x + 3 = \boxed{24} \].

(Simplify your answer.)

Answer: 24

34. Evaluate the following expression for \( x = 3 \), \( y = 4 \), and \( z = 1 \).

\[ 4y(4z - x) \]

The answer is \boxed{16}.

Answer: 16

35. Determine which numbers in the set are solutions of the equation.

\[ n - 6 = 12; \{16, 18, 20\} \]

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- A. \(
\boxed{\text{18}}\)
\) in the set \{16, 18, 20\} is a solution of the equation \( n - 6 = 12 \).

- B. None of the numbers in the set are solutions of the equation

Answer: A. \boxed{\text{18}} in the set \{16, 18, 20\} is a solution of the equation \( n - 6 = 12 \).
36. **Determine which numbers in the set are solutions of the equation.**

\[ 7n = 42; \{6, 36, 42\} \]

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- **A.** \[ \_\_\_\_\_\_\_\_\_\_\_\_ \] in the set \( \{6, 36, 42\} \) is a solution of the equation \( 7n = 42 \).
- **B.** None of the numbers in the set are solutions of the equation.

Answer: A. \[ 6 \] in the set \( \{6, 36, 42\} \) is a solution of the equation \( 7n = 42 \).

---

37. **Determine which numbers in the set are solutions of the equation.**

\[ 7n + 1 = 57; \{0, 6, 8\} \]

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- **A.** \[ \_\_\_\_\_\_\_\_\_\_\_\_ \] in the set \( \{0, 6, 8\} \) is a solution of the equation \( 7n + 1 = 57 \).
- **B.** None of the numbers in the set are solutions of the equation.

Answer: A. \[ 8 \] in the set \( \{0, 6, 8\} \) is a solution of the equation \( 7n + 1 = 57 \).

---

38. **Simplify.**

\[ 8 + 9 \cdot 3 - 10 \]

\[ 8 + 9 \cdot 3 - 10 = \_\_\_\_\_\_\_\_\_\_ \]

Answer: 25

---

39. **Solve. Check your solution.**

\[ x + 1 = 17 \]

The solution is \[ x = \_\_\_\_\_\_\_\_\_\_\_ \].

Answer: 16

---

40. **Solve. Check your solution.**

\[ 21 = y - 10 \]

The solution is \[ y = \_\_\_\_\_\_\_\_\_\_\_ \].

Answer: 31
41. Solve.

\[ 2x = 4 \]

The solution is \( x = \) ____________.

Answer: 2

42. Solve the equation. First combine any like terms on each side of the equation.

\[ x - 9 = -8 + 3 \]

The solution is \( x = \) ____________.

Answer: 4

43. Solve the equation. First combine any like terms on each side of the equation.

\[ 5x + 3 - 4x = 12 \]

The solution is \( x = \) ____________.

Answer: 9

44. Solve the following equation.

\[ 2x - 10 = 0 \]

\[ x = \] ____________

Answer: 5

45. Solve the equation.

\[ 5n + 15 = 60 \]

\[ n = \] ____________

Answer: 9

46. Solve the equation.

\[ 4x - 10 = 58 \]

The solution is \( x = \) ____________.

Answer: 17
47. Find the prime factorization of the following number.

56

The prime factorization of 56 is .

Answer: \(2^3 \cdot 7\)

48. Find the prime factorization of the following number.

27

The prime factorization of 27 is .

Answer: \(3^3\)

49. Find the prime factorization of the following number.

130

The prime factorization of 130 is .

Answer: \(2 \cdot 5 \cdot 13\)

50. Divide.

\[
\frac{2}{13} + \frac{21}{26}
\]

Select the correct choice below and fill in any answer boxes in your choice.

- A. \(\frac{2}{13} + \frac{21}{26} = \) (Type an integer or a simplified fraction.)
- B. The answer is undefined.

Answer: A. \(\frac{2}{13} + \frac{21}{26} = \frac{4}{21}\) (Type an integer or a simplified fraction.)

51. Divide \(-\frac{16}{17} + 32\). Write the quotient in simplest form.

\(-\frac{16}{17} + 32 = \) (Type an integer or a fraction.)

Answer: \(-\frac{1}{34}\)
52. Perform the indicated operation.

\[ \frac{6}{15} + \frac{7}{15} \]

\[ \frac{6}{15} + \frac{7}{15} = \frac{13}{15} \] (Simplify your answer.)

Answer: \( \frac{13}{15} \)

53. Perform the indicated operation.

\[ \frac{2}{11} + \frac{7}{22} \]

\[ \frac{2}{11} + \frac{7}{22} = \frac{17}{22} \] (Type an integer or a simplified fraction.)

Answer: \( \frac{17}{22} \)

54. Find \( \frac{1}{10} \) of 140.

\( \frac{1}{10} \) of 140 is \( \frac{14}{1} \). (Simplify your answer. Type a whole number, fraction, or mixed number.)

Answer: 14

55. Find \( \frac{6}{7} \) of 28. Write the answer in simplest form.

\( \frac{6}{7} \) of 28 is \( \frac{24}{1} \). (Simplify your answer.)

Answer: 24

56. Add and simplify.

\[ \frac{3}{20} + \frac{9}{20} \]

\[ \frac{3}{20} + \frac{9}{20} = \frac{12}{20} \] (Type an integer or a simplified fraction.)

Answer: \( \frac{3}{5} \)
57. Add and simplify.

\[
\frac{1}{2} + \frac{1}{4}
\]

\[
\frac{1}{2} + \frac{1}{4} = \quad \text{(Type an integer or a fraction.)}
\]

Answer: \(\frac{3}{4}\)

58. Perform the indicated operation.

\[
\frac{3}{7} - \frac{2}{9}
\]

\[
\frac{3}{7} - \frac{2}{9} = \quad \text{(Type a whole number or a simplified fraction.)}
\]

Answer: \(\frac{13}{63}\)

59. Use the order of operations to simplify the expression.

\[
\frac{1}{5} + \frac{1}{2} \cdot \frac{1}{6}
\]

\[
\frac{1}{5} + \frac{1}{2} \cdot \frac{1}{6} = \quad \text{(Type an integer or a fraction. Simplify your answer.)}
\]

Answer: \(\frac{17}{60}\)

60. Insert <, >, or = between the pair of numbers to form a true statement.

0.63 \quad 0.68

0.63 \underline{<} 0.68

Answer: <

61. Insert <, >, or = between the pair of numbers to form a true statement.

3.298 \quad 3.3

3.298 \underline{<} 3.3

Answer: <
62. Write <, >, or = between the pair of numbers to form a true statement.

0.897    0.89700

Answer: =

63. Round the decimal to the nearest tenth.

0.47

0.47 rounded to the nearest tenth is _________.

Answer: 0.5

64. Round 0.8123 to the nearest thousandth.

0.8123 ≈ ________

Answer: 0.812

65. Round the monetary amount to the nearest dollar.

$31.09

$31.09 rounded to the nearest dollar is $ _________.

Answer: 31

66. A used biology textbook is priced at $37.36. Round this price to the nearest dollar.

$37.36 rounded to the nearest dollar is $ _________.

Answer: 37

67. Write as a decimal.

\[
\frac{1}{5} = \frac{1}{100}
\]

Answer: 5.01
68. Add the following.

\[ 4.6 + 1.34 \]

\[ 4.6 + 1.34 = \boxed{} \] (Type an integer or a decimal.)

Answer: 5.94

69. Find the sum of 57, 4.003, and 6.302.

The sum is \boxed{}.

Answer: 67.305

70. Subtract and check.

\[ 9.7 - 7.5 \]

\[ 9.7 - 7.5 = \boxed{} \]

Answer: 2.2

71. Subtract and check the following.

\[ 19 - 3.7 \]

\[ 19 - 3.7 = \boxed{} \] (Type an integer or a decimal.)

Answer: 15.3

72. A landscape architect is planning a border for a flower garden shaped like a triangle. The sides of the garden measure 17.4 feet, 23.66 feet, and 22.8 feet. Find the amount of border material needed.

The amount of border material needed is \boxed{} feet.

(Type an integer or a decimal.)

Answer: 63.86
73. The bar graph shows the top five chocolate-consuming nations in the world. Use this graph to answer the following.

Which country has the greatest chocolate consumption per person?

Choose the correct answer below.

- Country B
- Country C
- Country D
- Country E
- Country A

Answer: Country B
74. The bar graph shows the top five chocolate-consuming nations in the world. Use this graph to answer the following.

Make a chart listing the countries and their corresponding chocolate consumptions in order from greatest to least.

Complete the chart below.

<table>
<thead>
<tr>
<th>Country</th>
<th>Pounds of Chocolate per Person</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1)</td>
<td></td>
</tr>
<tr>
<td>(2)</td>
<td></td>

(3) Country E 21.83
(4) Country C 20.94
(5) Country D 15.04
75. Find the unknown length in the figure.

The length is _______ inches.
(Type an integer or a decimal.)

Answer: 6.25

76. Use the values of the coins given below. Write the value of the group of coins shown to the right. To do so, it is usually easiest to start with the coin(s) of greatest value and end with the coin(s) of least value.

The total value of the group is $__________.

Answer: 1.30

77. Use the values of the coins given to the right. Name the different ways that coins can have a value of $0.15 given that you may use no more than 10 coins.

Choose the correct answer below. Select all that apply.

- [ ] A. 2 nickels and 5 pennies
- [ ] B. 1 dime and 1 nickel
- [ ] C. 3 nickels
- [ ] D. 3 nickels and 5 pennies
- [ ] E. 1 dime and 5 pennies
- [ ] F. 1 dime, 3 nickels and 3 pennies

Answer: A. 2 nickels and 5 pennies, B. 1 dime and 1 nickel, C. 3 nickels, E. 1 dime and 5 pennies

78. Multiply.

\[ 0.17 \times 6 \]

\[ 0.17 \times 6 = \_\_\_\_\_\_ \] (Type an integer or a decimal.)

Answer: 1.02
79. Multiply.

\[
\begin{array}{c}
8.5 \\
\times 0.7 \\
\hline
\end{array}
\]

\[
\begin{array}{c}
8.5 \\
\times 0.7 \\
\hline
\end{array}
\text{(Type an integer or a decimal.)}
\]

Answer: 5.95

80. Multiply.

8.2 \times 0.35

\[
8.2 \times 0.35 = \quad \quad 
\]

Answer: 2.870

81. Find the circumference of the circle in terms of \( \pi \). Then use the approximation 3.14 for \( \pi \) and approximate the circumference.

\[
\text{33 ft}
\]

a. Find the circumference of the circle in terms of \( \pi \).

The exact circumference is \( \quad \quad \) ft.

b. Find the circumference of the circle using 3.14 as an approximation for \( \pi \).

The approximate circumference is \( \quad \quad \) ft. (Round to the nearest hundredth as needed.)

Answers 33\pi

103.62
82. Find the circumference of the circle in terms of \( \pi \). Then use the approximation 3.14 for \( \pi \) and approximate the circumference.

\[ 3.7 \text{ yards} \]

a. Find the circumference of the circle in terms of \( \pi \).

The exact circumference is \( \underline{\phantom{0000}} \) yd.

b. Find the circumference of the circle using 3.14 as an approximation for \( \pi \).

The approximate circumference is \( \underline{\phantom{0000}} \) yd. (Round to the nearest thousandth as needed.)

Answers 7.4\( \pi \)

23.236

83. A 1-ounce serving of cream cheese contains 6.4 grams of saturated fat. How much saturated fat is in 8 ounces of cream cheese?

\[ \underline{\phantom{0000}} \text{g} \]

Answer: 51.2

84. The screen of a portable digital device is a rectangle that measures 4.5 inches by 3.2 inches. Find the area of the screen.

The area is \( \underline{\phantom{0000}} \) square inches. (Type an integer or a decimal.)

Answer: 14.4

85. The diameter of a ferris wheel is 200 feet. Find its circumference. Give an exact answer and an approximation using 3.14 for \( \pi \).

The circumference is \( \underline{\phantom{0000}} \) feet.

(Type an exact answer in terms of \( \pi \).)

The circumference is approximately \( \underline{\phantom{0000}} \) feet.

(Type an integer or a decimal. Round to the nearest hundredth as needed.)

86. A meter is a unit of length approximately equal to 39.37 inches. If someone is 1.87 meters tall, what is his or her approximate height in inches?

Using the given conversion, someone who is 1.87 meters tall has a height of \( \underline{73.6219} \) inches.

Answer: 73.6219

87. One year, farmers received an average of $13.065 per bushel of wheat. How much did a farmer receive for selling 100 bushels of wheat?

The farmer received $\underline{1306.50}$. (Round to the nearest cent as needed.)

Answer: 1306.50

88. Divide.

\[
3 \overline{11.1}
\]

The quotient is \( \underline{3.7} \).

(Type an integer or a decimal.)

Answer: 3.7

89. Divide.

\[
5 \overline{0.47}
\]

The quotient is \( \underline{0.094} \).

(Type an integer or a decimal.)

Answer: 0.094

90. Divide.

\[
0.04 \overline{24}
\]

The quotient is \( \underline{600} \).

(Type a whole number or a decimal.)

Answer: 600

91. Divide.

\[
0.71 \overline{4.189}
\]

The quotient is \( \underline{5.9} \).

(Type an integer or a decimal.)

Answer: 5.9
92. Divide.

\[ \begin{array}{c|cc|cc|cc}
& 0 & . & 0 & 4 & \underline{4} & 4 \\
\hline
\end{array} \]

The quotient is \[ \underline{1100} \]. (Type a whole number or a decimal.)

Answer: 1100

93. Find the decimal equivalent of the following fraction.

\[ \frac{13}{20} \]

\[ \frac{13}{20} = \underline{0.65} \]

Answer: 0.65

94. Write as an equivalent decimal.

\[ \frac{3}{4} \]

\[ \frac{3}{4} = \underline{0.75} \]

Answer: 0.75

95. Write \( \frac{5 - 7}{20} \) as a decimal.

\[ \frac{5 - 7}{20} = \underline{5.35} \]

Answer: 5.35

96. Write the numbers in order from smallest to largest.

0.453, 0.458, 0.45

In order, the given numbers are \( \underline{0.45, 0.453, 0.458} \).

(Use a comma to separate answers as needed.)

Answer: 0.45, 0.453, 0.458
97. Write the numbers in order from smallest to largest.

\[ 4.32, 4.23, \frac{34}{8} \]

Write the given numbers in order from smallest to largest.

\[ \underline{4.23}, \underline{34}, \underline{8}, \underline{4.32} \]

Answers 4.23

\[ \frac{34}{8} \]

98. Simplify the expression.

\[(0.4)^2 - 0.1\]

\[(0.4)^2 - 0.1 = \underline{0.06} \] (Type an integer or a decimal.)

Answer: 0.06

99. Find the value of the following expression. Give the result as a decimal.

\[ \frac{4}{5} - 9(7.8)\]

\[ \frac{4}{5} - 9(7.8) = \underline{-69.4} \] (Type an integer or a decimal.)

Answer: -69.4
100. Find the mean, median, and mode for the following set of numbers. If necessary, round the mean to one decimal place.

16, 21, 15, 23, 25

The mean is \[ \underline{ \hspace{2cm} } \].
(Type an integer or decimal rounded to one decimal place as needed. Use a comma to separate answers as needed.)

The median is \[ \underline{ \hspace{2cm} } \].
(Type an integer or decimal rounded to one decimal place as needed. Use a comma to separate answers as needed.)

Find the mode. Select the correct choice below and, if necessary, fill in the answer box to complete your choice.

- A. The mode is \[ \underline{ \hspace{2cm} } \].
  (Type an integer or decimal rounded to one decimal place as needed. Use a comma to separate answers as needed.)

- B. There is no mode.

Answers 20

21

B. There is no mode.

101. A stereo normally priced at $839 is on sale for 25% off. Find the discount and the sale price.

The discount is $\underline{ \hspace{2cm} }\) .

The sale price is $\underline{ \hspace{2cm} }\) .

102. Use the information given to draw a vertical bar graph.

<table>
<thead>
<tr>
<th>Fiber Content of Selected Foods</th>
<th>Grams of Total Fiber</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>2.5</td>
</tr>
<tr>
<td>B</td>
<td>1.0</td>
</tr>
<tr>
<td>C</td>
<td>4.0</td>
</tr>
<tr>
<td>D</td>
<td>1.5</td>
</tr>
<tr>
<td>E</td>
<td>3.5</td>
</tr>
<tr>
<td>F</td>
<td>2.0</td>
</tr>
</tbody>
</table>

Choose the correct graph below.

- [ ] A.  
- [x] B.  
- [ ] C.  
- [ ] D.  

Answer: B.

103. The frequency distribution of the golf scores for an amateur golfer is shown on the right. Use the frequency distribution to construct a histogram.

<table>
<thead>
<tr>
<th>Class Intervals (Scores)</th>
<th>Class Frequency (Number of Games)</th>
</tr>
</thead>
<tbody>
<tr>
<td>60-69</td>
<td>1</td>
</tr>
<tr>
<td>70-79</td>
<td>4</td>
</tr>
<tr>
<td>80-89</td>
<td>3</td>
</tr>
<tr>
<td>90-99</td>
<td>2</td>
</tr>
</tbody>
</table>

Which graph below is the correct histogram?

- [ ] A. 
- [ ] B. 
- [ ] C. 

Answer: B.
104. The circle graph is a result of surveying 700 college students. They were asked where they live while attending college. Use this graph to find where most of these college students live.

Choose the correct answer below.

- A. Campus housing
- B. Off-campus rental
- C. Other arrangements
- D. Own off-campus housing
- E. Parent or guardian's home

Answer: E. Parent or guardian's home

105. The circle graph shows the number of students at Rockford College who are enrolled in various majors. Find the ratio of Science majors to English majors.

The ratio is \[ \frac{3}{5} \].

Answer: \[ \frac{3}{5} \]

106. The total amount of land of some particular countries is approximately 73,000,000 square miles. Use the graph to find the area of the Country F.

The area of the Country F is approximately \[ \underline{13,140,000} \] square miles.

Answer: 13,140,000
107. The circle graph to the right shows the percent of the types of books available in a library.

If the library has 126,000 books, find how many books are classified as Children's fiction.

The number of books classified as Children's fiction is \( \square \).  
(Type a whole number.)

Answer: 26,460

108. If this library has 220,000 books, find how many books are in the category of reference or other?

The number of books in the reference or other category is \( \square \) books.

Answer: 44,000

109. Find the square root.

\[ \sqrt{25} = \square \]

Answer: 5

110. Find the length of the third side of the right triangle.

The length of the third side is \( \square \).

Answer: 13
111. Sketch the right triangle and find the length of the side not given. If necessary, approximate the length to the nearest thousandth.

\[ \text{leg } = 15, \text{ leg } = 8 \]

What is the length of the side not given?

______________ (Round to the nearest thousandth as needed.)

Answer: 17

112. Sketch the right triangle and find the length of the side not given.

\[ \text{leg } = 20, \text{ hypotenuse } = 29 \]

The unknown length is ________________.

(Type an integer or decimal rounded to the nearest thousandth as needed.)

Answer: 21

113. Find the ratio of the corresponding sides of the given similar triangles.

\[ \frac{22.5}{25} = \frac{10}{20} \]

The ratio of the corresponding sides of the first triangle to the second triangle is ________________.

(Type the ratio as a simplified fraction.)

Answer: \( \frac{5}{4} \)

114. Given that the pair of triangles is similar, find the length of the side labeled \( n \).

\[ \frac{9}{13.5} = \frac{3}{n} \]

\[ n = \text{______________} \]

Answer: 4.5
115. Given that the pair of triangles is similar, find the length of the side labeled \( n \).

\[
\begin{align*}
\text{Given:} & \quad \triangle ABC \sim \triangle DEF \\
\text{Sides:} & \quad AB = 90, \quad BC = 27, \quad DE = 20, \quad EF = n
\end{align*}
\]

\[
\frac{AB}{DE} = \frac{BC}{EF} \Rightarrow \frac{90}{20} = \frac{27}{n}
\]

Answer: 6

116. A triangle is formed by the building's height and shadow. Another triangle is formed by the flagpole's height and shadow. Using the following diagram, find the height of the building.

\[
\begin{align*}
\text{Given:} & \quad \triangle ABC \sim \triangle DEF \\
\text{Sides:} & \quad AB = 50, \quad BC = 25, \quad DE = 5, \quad EF = x
\end{align*}
\]

\[
\frac{AB}{DE} = \frac{BC}{EF} \Rightarrow \frac{50}{5} = \frac{25}{x}
\]

The height of the building is \( x \) feet.

Answer: 250
117. Draw a tree diagram for choosing a vowel, (a, e, i, o, u) and then a number (1, 2, 3 or 4). Use the diagram to find the number of possible outcomes.

Based on the tree, what is the number of possible outcomes? 

Answers

B. 20
118. Draw a tree diagram for spinning Spinner B 3 times. Use the diagram to find the number of possible outcomes.

Based on the tree, what is the number of possible outcomes?

Choose the correct tree diagram below.

- **A.**
- **B.**
- **C.**
- **D.**

Answers

- B.
- 8
119. Draw a tree diagram for tossing a coin two times and spinning Spinner B two times. Use the diagram to find the number of possible outcomes.

Based on the tree, what is the number of possible outcomes?
120. If a single 8-sided die is tossed once, find the probability of rolling an odd number.

The probability is \( \frac{1}{2} \). (Type an integer or a simplified fraction.)

Answer: \( \frac{1}{2} \)

121. Suppose the spinner shown is spun once. Find the probability of spinning 3.

The probability is \( \frac{1}{5} \). (Type an integer or a simplified fraction.)

Answer: \( \frac{1}{5} \)
122. A marble is selected at random from a jar containing 2 red marbles, 3 yellow marbles, and 6 green marbles. What is the probability that the marble is red?

The probability that the marble is red is \( \frac{2}{11} \). (Type an integer or a simplified fraction.)

Answer: \( \frac{2}{11} \)

123. Find the perimeter of the following figure.

![Rectangle](image)

Perimeter = \( \quad \) (1) \( \quad \)

(1) \( \square \) ft

(1) \( \text{ft} \)

Answers 46

129. Convert the measurement indicated.

144 in to feet

144 in = [ ] ft

Answer: 12

130. Convert the measurement as indicated.

13 yd to feet

13 yd = [ ] ft

Answer: 39

131. Convert the measurement as indicated.

$13\frac{1}{2}$ ft to inches

$13\frac{1}{2}$ ft = [ ] in (Simplify your answer. Type an integer, fraction, or mixed number.)

Answer: 162

132. Convert the measurement as indicated.

28 ft to yards

28 ft = [ ] yd (Simplify your answer. Type an integer, fraction, or mixed number.)

Answer: $\frac{1}{9}$
133. Convert the measurement as indicated.

21 in to feet

21 in = ______ ft (Type an integer or a decimal.)

Answer: 1.75

134. A woman drank 630 ml of water from a 2-liter bottle. How much water remains in the bottle?

There are ______ L of water remaining in the bottle.

Answer: 1.37

135. A common syringe is one with a capacity of 3 cc. Use the diagram and give the measurement indicated by the arrow.

The measurement indicated by the arrow is ______ cc. (Type an integer or a decimal.)

Answer: 1.4

136. Use the commutative and associative properties to simplify the expression.

\[(7 + a) + 7\]

\[(7 + a) + 7 = \] ______

Answer: \(a + 14\)
137. The perimeter of a geometric figure is the sum of the lengths of its sides. The perimeter of the pentagon (five-sided figure) on the right is 14 centimeters.

a. Write an equation for perimeter.
b. Solve the equation in part (a).
c. Find the length of each side.

a. Choose the correct answer below.

○ A. \( x + x + x + 2x + 2x = 7 \)
○ B. \( x + x + x + 2x + 2x = 14 \)
○ C. \( x + x + x + x + x = 14 \)
○ D. \( 4x^5 = 14 \)

b. \( x = \) (Simplify your answer.)

c. The shorter sides have a length of (1) (Simplify your answer.)

The longer sides have a length of (2) (Simplify your answer.)

(1) \( \text{cm} \)  \( \text{cm}^2 \)
(2) \( \text{cm} \)  \( \text{cm}^2 \)

Answers B. \( x + x + x + 2x + 2x = 14 \)
